2017   59%

PROFILE

Goal oriented, Constantly checking in with the goal to determine how close or how far away we are and what it will take to make it happen. I find this pressure inspiring and a great motivator for the rest of the team.

PROJECTS

MARVEL   Github   *2022*

- Built using **HTML, CSS** and **JAVASCRIPT.**
- An informative website which gives a short information about avengers and most popular movies with there IMBD rating and it has a small shopping cart also.

MUSIC PLAYER   Github   *2022*

- Built using **HTML, CSS** and **JAVASCRIPT.**
- Digital music player or portable audio player, is a handheld device that plays and stores audio.

SUPER MARKET BILLING SYSTEM   *2022*

- In this project, Various functions are created for this project, like add function to add the goods and products in the market and delete function to delete some products, etc.
- Also, Created a buyer side as well, where the buyer can buy the products or food items of his choice in a very detailed manner.
- Different concepts of C++ are used in making this project which helped me learn the practical application of C++ .

AIRLINE REGISTRATION SYSTEM   *2022*

- This project on the Airline registration system in C++ will allow a user to book a flight to a particular country of his choice, and he/she will receive the ticket by filling in all the important details, the user can also choose the date and time of the flight according to his/her choice.
- Different concepts of C++ are used in making this project which helped me learn the practical application of C++ .
